

Maintenance Technician – Greensboro, NC

Ionbond is looking for a skilled and driven Maintenance Technician to support our growing operations. In this hands-on role, you'll be instrumental in ensuring our production equipment operates at peak performance through proactive maintenance, timely repairs, and equipment rebuilds. This position offers a diverse range of responsibilities across electrical, mechanical, and general facility maintenance. We're seeking candidates with a background in industrial manufacturing, a problem-solving mindset, and a passion for technical excellence. You'll report directly to the Plant Manager and work alongside a collaborative team. If you're a self-starter who thrives in a fast-paced environment and wants to make a meaningful impact, we invite you to apply and become a key part of our success.

Ionbond – The Surface Engineers™

Ionbond provides advanced coating solutions for applications in the aerospace, medical, food contact, automotive, decorative, tooling and fuel cells industries. We offer a broad range of hard, low-friction, wear-resistant coatings based on PVD, PACVD and CVD technologies.

With over 30 job coating centers in 15 countries in Europe, North America and Asia, Ionbond has one of the largest coating networks in the world. Ionbond is part of renowned Japanese industrial consortium IHI Group.

What defines this job?

- Perform scheduled and unscheduled maintenance on equipment, clean line, and other plant machinery to ensure optimal operation.
- Accurately document and maintain records of equipment notifications, maintenance histories, and technical drawings, including blueprints and schematics
- Troubleshoot and repair vacuum systems, demonstrating confidence and proficiency in working with high-voltage components.
- Assess repair and maintenance needs, prioritizing actions to minimize downtime and optimize equipment reliability.
- Monitor equipment performance and uptime, developing and implementing strategies to reduce breakdowns and improve operational efficiency.
- Collaborate with managers and process engineers to effectively address manufacturing interruptions, inconsistent process results, and equipment downtime.
- Maintain a clean, organized, and efficient workspace, supporting the 6S Program and fostering a culture of safety and organization.
- Perform additional duties as needed.

What do we offer?

Unleashing potential is at the core of our approach. We provide a dynamic environment that opens doors to both international and local growth opportunities, helping you reach your full potential. Here's what you can expect from being part of our team:

- International and local growth opportunities
- Diverse work environment where we embrace teamwork and innovation that drives us towards new applications and customer service excellence
- Competitive compensation package: salary based on experience and educational credentials
- Medical, dental, and vision benefits with affordable premiums and annual deductibles
- Flexible spending accounts (medical and dependent care)
- Life insurance
- Short-term & long-term disability
- Employee assistance program
- Generous Paid Time Off
- Tuition Reimbursement
- 401k Safe Harbor Retirement Account plus company match

What do we ask?

Must have a minimum of 3 years industrial manufacturing environment maintenance experience. Degree/Certification in Engineering, Technical or Trade education preferred; diploma/GED minimum required education. Experience with Vacuum Technology. Strong ability with understanding failure mechanisms, ability to isolate determine root cause, and repair. Strong electrical skills. Working knowledge of control systems, PLC controls. Able to work independently, is a self-starter, and is highly motivated to complete projects and meet deadlines. Possess good communication skills; able to clearly communicate with peers, management, and suppliers, both verbally and in email communication. Available to work overtime and weekends as required. Must be authorized to work in the U.S. and pass a criminal background check and physical screening. Able to travel on occasion to other U.S. Centers and internationally as needed.
